*jvit85@gmail.com | 615-579-0520 | Dallas, Texas*

*LinkedIn: linkedin.com/in/justin-vititoe-a557b461/ | GitHub:github.com/jvit1985 |*

*Portfolio: jvit1985.github.io/portfolio/*

*Full stack web developer leveraging my sales background to build a more client friendly web experience. Recently earned a certificate in full stack development from Southern Methodist University, with newly developed skills in JavaScript, CSS, React.js, RESTful API's and responsive web design. Passionate about approaching programming challenges from different angles and collaborating with others to create meaningful web applications. Excited to develop responsive websites. With each project, my aim is to best engage my audience for an impactful user experience. I'm excited to leverage my skills as part of a fast-paced, quality-driven team to build better experiences on the web.*

### **Technical Skills**

*Frontend: HTML5, CSS, JQuery, Javascript, Bootstrap, ES6, MVC, RESTful API*

*Backend: MySQL, MongoDB, Express, ReactJS, Node, Handlebars, NoSQL*

### **Projects**

***Trending Ape*** | <https://github.com/jvit1985/trending-ape> | <https://samborski55.github.io/smu-bootcamp-group-project-one/>

*My role in the project was to get the APIs to pull the data into the project, and built some of the button functionality in Javascript*

- This app pulls the top trending reddit stocks and compares it to actual stock performance*
- This project allows users to compare reddit sentiment on a stock and compare it to the actual performance of the stock. You can also search for a stock by the ticker symbol and pull current day high/low and 52 week high/low data*
- Tools/Languages: HTML, CSS, Javascript, Bootstrap, Foundation, 3rd party APIs*

***Tech Blog*** | <https://github.com/jvit1985/tech-blog> | <https://guarded-garden-41223.herokuapp.com>

*My role in the project was to build the entire site from scratch, front and back end.*

- This app allows users to login or signup, once logged in they can view other users posts and post their own content as well as comment on other user's posts.*
- This project accomplished my goal of building a functioning site with encryption and to build databases to store information the client can manipulate and interact with on the front end.*
- Tools/Languages: Node, Express, MySQL, bcrypt, Javascript, Handlebars, HTML, CSS*

**Know the Weather** | <https://github.com/jvit1985/know-the-weather> |  
<https://jvit1985.github.io/know-the-weather/>

*My role in this project was to build the front end, including 3rd party APIs*

- *This app allows users to search for a city and get a 5 day forecast for that city*
- *This project allows users to search for any city and have the current and 5-day forecast pull up. It also saves the searched cities as buttons on the side that can be searched again by clicking.*
- *Tools/Languages: HTML, CSS, Javascript, API's, Bootstrap*

## **Work Experience**

### **TexasLending.com**

*Mortgage Loan Originator*

*August 2021- Present  
Dallas, Texas*

- *Maintained a pipeline of over 30 clients in various stages of the refinance process, from initial application to funding.*
- *Communicated with other departments to ensure that client expectations and satisfaction were obtained.*
- *Funded between 2 million to 3 million in loans monthly while using multiple systems to ensure proper procedures were followed and communication was prioritized.*

### **Mr. Cooper**

*Mortgage Loan Originator*

*August 2020- August 2021  
Lewisville, Texas*

- *Advised clients on various products, as well as advantages and drawbacks of each option in order to tailor available products to clients' wants and needs.*
- *Provided cross department communication in order to maintain a smooth and efficient experience for all clients throughout the mortgage process.*
